From day one you will get real hands-on experience, develop your skills and enhance your knowledge and commercial awareness working with our accredited NEC4 Project Managers and Chartered (RICS) Quantity Surveyors.

esc

construction consultants

Mentoring

Our tailored APC Candidate Training Plan means that you will be supported in your work and have the opportunity to learn from our exceptional, skilled and talented team to develop your career.

Training & Development

With esc you will have the opportunity to progress your career with innovative in-house and external structured training. We will support you on your path to achieve professional qualifications and accreditations.

esc is an equal opportunities employer.

Benefits

As part of the esc team you will benefit from:

- Highly competitive salary package
- Company perks scheme
- Company pension
- Uniquely flexible working arrangement - a 9 day working fortnight with every other Friday off - to enhance your wellbeing and create a great work life balance
- Paid training
- 31 days annual leave, with additional benefits for long service
- On-site free car parking

Who we are looking for

We are looking for people who, like us, take pride in the work you do and at being the best at what you do.

People who enjoy a challenge, are driven by results and get a buzz from working on a range of exciting projects.

People who are ambitious, innovative and want to learn.

People who bring their energy, enthusiasm and can-do attitude to our down to earth, dynamic team.

Career opportunities at esc

There are many options and alternative routes in education for students and we work collaboratively with universities to provide opportunities for:

Graduates

As a recent graduate, or one who is due to graduate this year, you can start your path to success in your chosen career with esc. You will have, or will be undertaking, a degree in Quantity Surveying or Construction Management but equally you will have a passion for the built environment and helping to deliver world class buildings.

Placement Students

We are proud of our long track record of providing rewarding placements for enthusiastic students, with opportunities for practical experience across a wide variety of projects, to develop the required skills and enhance employability. We will work with you to establish a blend of work and study that supports your development. We will also encourage and support you if you wish to continue post-graduate study whilst in full-time employment.

Work While Studying

If full-time study isn't for you, you can get hands-on experience working at esc whilst studying for your degree part-time.

Placement Student Aisling Brogan

Aisling undertook her placement with esc in 2020/21 and has now returned to Ulster University to continue her studies in BSc (Hons) Quantity Surveying and Commercial Management.

"I was always interested in the consultancy side of quantity surveying so was delighted to get a placement with esc. Throughout the year I got real hands-on experience, worked on live projects and learned so much from a great team."

Aisling was runner up in the Ulster University Innovation in Placement Awards 2021, Built Environment Category. The awards recognise those students who have made a significant impact on the organisation they are placed with during their period out in industry.

Placement & Work While Studying Aaron Carson BSc

Aaron joined esc on his placement year in 2018 as part of his degree in BSc (Hons) Quantity Surveying and Commercial Management at Ulster University. On completing his placement year, Aaron realised that full-time study wasn't for him so he worked with esc getting hands-on project experience whilst studying for his degree part-time.

"Since joining as a placement student I have constantly progressed, gained extensive experience and increased my confidence. As I became more experienced, I was given the role of post contract Quantity Surveyor on a number of jobs including a £9m project at Methodist College Belfast. There is a brilliant atmosphere within the esc office, everyone is friendly."

In 2021 Aaron graduated and continues to work with esc.
